PERSONAL SUMMARY

Backend Developer with 1 year of experience building production systems in the F&B SaaS industry. Proficient in Node.js, MongoDB, and cloud services, with hands-on experience in payment integrations, third-party APIs, and analytics pipelines. Passionate about writing clean, reliable code and leveraging AI tools to ship faster.

EDUCATION

Hanoi University of Science and Technology

Oct 2022 – Present

BS in Computer Engineering

- GPA: 3.7/4.0

EXPERIENCE

Backend Developer

Apr 2025 – Present

Mmenu, Vietnam

Mmenu POS — *Express.js, MongoDB, AWS, GCP, Firebase, Jest*

- Developed and maintained RESTful APIs for core POS operations: ordering, payment processing, invoice management and real-time notifications.
- Integrated payment gateways (VNPay, Finviet SmartPOS) and tax/e-invoice software (Easy Invoice, MISA), implement scheduled automatic tax reporting.
- Built automated revenue file transfer to shopping mall FTP servers for tenant reporting compliance.
- Wrote and optimized complex MongoDB aggregation pipelines for revenue, and profit calculations.
- Wrote integration tests using Jest; used AI coding tools (Claude, Codex) to boost development productivity.

Mmenu CDP — *NestJS, MongoDB, Zalo API*

- Built and maintained the customer loyalty platform: points accumulation rules, voucher time-based settings, periodic reset, and per-invoice/product discount modules.
- Integrated Zalo OA for member registration templates, scheduled messaging campaigns, and service review flows.
- Implemented promotion modules (bill-level and product-level discounts) with Excel export and deduplication logic to prevent duplicate promotions from being applied after deletion.
- Resolved data consistency bugs: customer search failures, report display errors, and incorrect loyalty transaction blocking.

Mmenu BI — *NestJS, MongoDB, GCP*

- Built analytics features including hourly/shift-based statistics, return/refund analysis by reason, and product & order-level stats with region and table dimensions.
- Developed export functionality (Excel, TXT, email delivery) for revenue, sales, and custom restaurant-specific reports.
- Implemented restaurant-specific report templates and monthly sales format changes for multiple restaurant chains.

PROJECTS

Mock Interview AI Platform

Feb 2026 - Apr 2026

Hanoi University of Science and Technology

- Description: Developed a full-featured AI-powered mock interview platform supporting multiple interview rounds: Live Coding with sandboxed code execution, Behavioral interview with AI Facilitator, AI Prompting, and System Design with an interactive whiteboard. Integrated LLM to provide real-time Socratic guidance, on-demand hints, and automated evaluation across all rounds. Built an Admin Portal for managing problem banks and session configurations.
- TechStack: NestJS, React, Redux-Saga, TypeORM, PostgreSQL, Redis, BullMQ, Claude Code, React Flow, Web Speech API.
- Link Github: <https://github.com/Canh3005/Mock-Interview-App>

Professional Project Showcase & Team Collaboration Platform

Sep 2025 - Dec 2025

Hanoi University of Science and Technology

- Description: Built a full-stack platform combining project portfolio showcase with team collaboration. Features include a block-based rich content editor, a 4-tier RBAC system (Owner/Admin/Member/Viewer) enforcing hub-level permissions, a recruitment module for posting positions and onboarding members, and real-time chat via Socket.io, media handled via Cloudinary CDN.
- TechStack: Node.js, Express, React, MongoDB, Redis, Socket.io, Cloudinary, Docker.
- Link Github: <https://github.com/Canh3005/PingUp>

LANGUAGES

English

- Intermediate, daily conversation.

TECHNICAL SKILLS

Programming languages: Javascript, TypeScript.

Back-End: NestJS, Express.js, WebSocket, SSE.

Front-End: React.js, TailwindCSS, Redux-Saga, HTML, CSS.

Database: MongoDB, PostgreSQL, Redis.

Infrastructure & DevOps: Docker, AWS, Vercel, Render.

AI Tools: Claude Code, Codex, Groq API.

Version Control: Git, GitHub.
